Descripción

Este libro —hecho de pedacería fotográfica— resultó ser una especie de génesis precario. Memoria encontrada de nuestros antepasados, “los antiguos”, cuando eran montañas, días primigenios de la volcana y el hombre-volcán, tiempos de gigantes que poblaron nuestro imaginario y de fuerzas geológicas que le prestan cuerpo y rostro a la Patria.

En el centro del país es común encontrar muros pintados, cerámicas, calendarios, llaveros, tambores, ceniceros, copas tequileras y un largo etcétera con representaciones de mitos fundacionales: los orígenes de la mujer, del hombre, de la Patria, inscritos en la superficie variopinta de objetos de decoración. Al mismo tiempo, las formas y estilos de toda esta parafernalia, los materiales utilizados, la manera en que circulan y cómo se les da uso, reflejan con claridad un rostro colectivo nuestro.

Los antiguos códices mexicanos son documentos fundamentales en el imaginario de México; este libro honra esa memoria.

30 Mar 2016 . The starting point is Montaña Blanca, a mountain fully made of pumice stone. This mountain features some brown freckles, comprised of round rocks of a couple of tons that were expelled by the eruptions as if by a big cannon. The islanders, simple, straightforward people, call them the "balls of Teide".

16 Mar 2015 . View of Montana Blanca during the approach After arriving at Lanzarote airport and hiring a car, I made a beeline for this summit. I arrived pretty quickly from the airport (15 minute drive) and parked near a farm at the base of the summit. The summit gets its name due to its white rock which is quite unusual.

The first eruptions of Montaña Blanca came from five vents along a fissure radiating from Teide and gave off flows of brown phonolite. They were followed by a subPlinian explosion of frothy phonolites, which was the most violent eruption on Tenerife since the formation of the Caldera de las Cañadas. It formed the Montaña.

Buy Montaña Blanca: Read Everything Else Reviews - Amazon.com.

19 Dec 1994 . The only known substantial post-caldera explosive eruption occurred ~2 ka bp from satellite vents at Montaña Blanca (MB), to the east of Teide and at PV. The MB eruption began with extrusion of $\approx 0.022 \text{ km}^3$ of phonolite lava (unit I) from a WNW-ESE fissure system. The eruption then entered an.
