Descripción

The catastrophe on 11 March 2011 has had a deep impact on the Japanese society, and on our global world. Almost twenty thousand people were left dead or missing after the disaster, and the tsunami destroyed entire communities. It will take years for the full extent of the nuclear crisis' impact on Japan to become clear. Yet, a year after the tsunami, it is possible to see some of the consequences that the disaster has had on agriculture, the fishing industry, people's health and research about renewable energy sources.

In her reportage book Fukushima Colours, multilingual author Elin Lindqvist has documented the aftermath of the crisis, in collaboration with Japanese journalist Yuko Ota, and Japanese photographer Yoshikazu Fukuda. She has closely followed eight individuals or groups of individuals representing different parts of Japanese society all through 2011, in order to see how people affected by the crisis have recovered. Through these individual stories, we hear the emergence of a common voice striving towards a more sustainable and ecological future in Japan.
